

IV THERAPY & ADMINISTRATION

Length of Course: Blended Format: Online and Classroom Lab Practice Session

Total hours: 30 hours

Registration: Ongoing

Registration/Payment Deadline: Payment due at Registration

Program Description: This comprehensive 30-hour course is a blended program that includes online lessons and classroom hands on training. This course prepares participants to effectively deliver nursing care to patients on infusion therapies and gain confidence in their abilities, through instructor assisted online self-study and practice with vascular access device (VAD) training. Participants learn to initiate, monitor, and manage patients receiving patient infusions. Students have up to 12 weeks to complete the online lessons and hands on classroom session. Your 30.0 hour CE course completion certificate will be provided once you have completed the online lessons and hands on lab session.

Once you have completed your registration and paid the course fee, you will receive a confirmation email with a link to create your online account and an enrollment key to login and begin your course. NOTE: Once you register and receive the enrollment key, there are no refunds.

Course Content: Our standard instructor led program addresses the following IV Therapy issues:

- Anatomy & Physiology review
- Circulatory System
- Indications for Infusion Therapy
- Central Lines
- Peripheral Lines
- Peripheral Venipuncture
- Methods of Infusing IV Fluids/Medications
- IV Site Selection
- IV Site Care
- Infection Control
- Complications
- Documentation
- Patients with Special Needs

Course Objectives:

- Explain the indication and contraindications of peripheral IV therapy
- Define selected venipuncture terms
- Discuss infection control guidelines related to IV therapy
- Discuss relevant anatomy related to site selection restrictions
- Select the right equipment to insert and remove a peripheral IV catheter
- Calculate infusion rates
- Discuss care and monitoring of a patient with an IV
- Discuss management of common complications of peripheral IV catheters
- Discuss legal implications of IV therapy
- Insert a peripheral IV on an anatomical model
- Remove peripheral IV from an anatomical model

Cost of Course: \$365.00 per student
